

2326. Spiral Matrix IV

Solved

Medium Topics Companies Hint

You are given two integers `m` and `n`, which represent the dimensions of a matrix.

You are also given the `head` of a linked list of integers.

Generate an `m x n` matrix that contains the integers in the linked list presented in **spiral order (clockwise)**, starting from the **top-left** of the matrix. If there are remaining empty spaces, fill them with `-1`.

Return *the generated matrix*.

Example 1:

Input: `m = 3, n = 5, head = [3,0,2,6,8,1,7,9,4,2,5,5,0]`
Output: `[[3,0,2,6,8],[5,0,-1,-1,1],[5,2,4,9,7]]`
Explanation: The diagram above shows how the values are printed in the matrix. Note that the remaining spaces in the matrix are filled with `-1`.

Example 2:

Input: `m = 1, n = 4, head = [0,1,2]`
Output: `[[0,1,2,-1]]`
Explanation: The diagram above shows how the values are printed from left to right in the matrix. The last space in the matrix is set to `-1`.

Constraints:

- `1 <= m, n <= 105`
- `1 <= m * n <= 105`
- The number of nodes in the list is in the range `[1, m * n]`.
- `0 <= Node.val <= 1000`
